

We are listeners of K-Love. K-Love is the exclusive music station in our home. We have young children who also listen to the station with us. K-Love is a source of encouragement to us and our children as it is free of foul language, sexual content, etc. Don't we want our children listening to music that encourages them to good works rather than violence and dangerous behavior such as is found on so many music stations these days? K-Love is also a source of help for those in the community who are hopeless, depressed, etc. as they provide free counseling and a caring heart 24/7 to anyone who calls. K-Love also provides many services to the community including free advertising of local community events that benefit the community as a whole. We would sorely miss K-Love if they were bumped off the air by an LPFM station. K-Love is hugely popular all over the country and around the world - it is listener supported and continues to grow. We appreciate your consideration of our concerns on the behalf of K-Love
